The 86m Starlight project by Darnet Design

Franck Darnet and Jean-Claude Carme of TWW Yachts Brokers unveiled the innovative features of the new amazing 86m Starlight project during a press conference held at the brokers' office in Monaco during the Monaco Yacht Show.

Starlight is characterized by an elegant and timeless design showing tight and modern lines with all the onboard comfort and technologies for long range sailing under every sea condition.

Her great uniqueness includes the rear exterior saloon on Lower Deck which, added to the Beach Club, provides the owner an unexpected overall surface area.

The pool is going to overlook this remarkable area. Furthermore, the atrium in the Main salon has an exclusive locking system and features a unique in-house designed moving platform, never seen on a yacht before.
